## TO THE CHAIRMAN AND MEMBERS OF THE BRECONSHIRE EDUCATION COMMITTEE

---

Mr. Chairman, Ladies and Gentlemen—

I have the honour to present to you the Fifty-fifth Annual Report of the School Medical Services in the County, during the year ending 31st December, 1965.

The health of Breconshire's school population is very satisfactory indeed.

During the year, 881 children attending Primary Schools were medically examined, and 1,090 children who were attending County Grammar and County Secondary Schools.

Of these, 1,971 children, two children were found to be unsatisfactory medically.

**Handicapped Pupils—Special Schools**—In parts VI and VII appended to this report will be found full details of handicapped children in the County, including those for whom places have been found in Special Schools.

**Penyore Open Air Residential School for Delicate Pupils.**—During the year, 2 delicate children were admitted to this school and 4 pupils were discharged when the School closed down in December, 1965.

**Education Act, 1944, Section 57.**—During the year four children were referred by the School Medical Services Sub-Committee to the Local Health Authority under Section 57 of the Education Act, 1944, as being unsuitable for education in school.

**School Closures**—No schools were closed on account of infectious disease during the year.

**Speech Therapist.**—Miss G. A. Samuel terminated her services with your Authority on 31.7.65 on marrying and leaving the area.

It is hoped that a successor will be found soon for this important work in preventive medicine.

This introduction would be incomplete without reference to the co-operation and ready assistance afforded by the Chief Education Officer and his teaching and administrative staff, and the loyal and conscientious service rendered by the medical, nursing and clerical staff of the School Health Service.

Once again, I express my appreciation to the Chairman and members of the Education Committee for their continued support.

I have the honour to be,

Mr. Chairman, Ladies and Gentlemen,

Your obedient servant,

R. G. EVANS,

Principal School Medical Officer

County Health Department,

The Watton, Brecon.

May, 1966.

# BRECONSHIRE SCHOOL CLINICS.

Clinic, Park Road, Builth Wells	.. 2nd and 4th Wednes- days in the month a.m.		4th Monday in the month a.m.	2nd and 4th Thursdays in the month, p.m.	Tuesdays a.m.	1st Monday in month a.m. and p.m.
School Clinic, Ysgol-y-graig, Cefn Coed	.. 1st and 3rd Wednes- days in the month a.m.		1st Thursday in the month p.m.	1st and 3rd Tuesdays in the month.	2nd, 3rd and 4th Thursdays p.m.	2nd Tuesday in month a.m. and p.m.
Clinic, Town Hall, Talgarth	.. —		1st Tuesday in the month p.m.	—	—	—
Clinic, Market Hall, Crickhowell.	.. 1st and 3rd Wednes- days in the month a.m.		3rd Thursday in the month p.m.	1st and 3rd Tuesdays p.m.	Fridays a.m.	4th Wednesday in month a.m. and p.m.
Clinic, Oxford Road, Hay-on-Wye	.. 2nd and 4th Wednes- days in the month p.m.		4th Thursday in the month a.m.	—	Tuesdays p.m.	3rd Monday in month a.m. and p.m.

In addition to the above sessions provided by the Authority, the County Ophthalmic Surgeons attend when required at the Brecon, Brynmawr, Builth and Ystradgynlais Clinics, and the Orthopaedic Specialists attend at the Brecon, Brynmawr and Ystradgynlais Clinics when required.

## TABLE OF PRIMARY AND SECONDARY AND COUNTY GRAMMAR SCHOOL CHILDREN

Number of Departments	...	91
Number of Scholars on the Roll	...	9148

### DIPHTHERIA IMMUNISATION.

Number of children immunised by the Council's Medical Officers and by General Practitioners during the year ended 31st December, 1965:—

	Year of birth.					Others under 16.	Total.
	1965.	1964.	1963.	1962.	1958-61.		
Primary doses	.. 297	357	39	11	101	142	947
Re-inforcing doses	.. 1	179	302	29	621	713	1,845

### PRIMARY SCHOOLS.

Number of Children examined:—

	Males	Females	Totals
Routine Inspections	... 458	423	881
Special Inspections	... 16	12	28
Re-Inspections	... 140	125	265
	—	—	—
Totals	... 614	560	1174

### SECONDARY AND COUNTY GRAMMAR SCHOOLS.

Number of Children examined:—

	Males	Females	Totals
Routine Inspections	... 494	596	1090
Special Inspections	... —	—	—
Re-Inspections	... 89	101	190
	—	—	—
Totals	... 583	697	1280

### TREATMENT OF VISION.

#### Table of Cases Examined by the Eye Specialist.

No. of cases seen			No. of cases for whom glasses were prescribed
New cases	Re-inspections	Total	
70	153	223	136

## Table of Cases seen by the Deputy County Medical Officer and Assistant Medical Officer.

No. of cases tested	No. for whom spectacles prescribed
141	38
No. referred to Eye Specialist.	

### EYE OPERATIONS.

All cases of eye operation are now referred by Mr. G. W. Hoare, F.R.C.S., the County Ophthalmic Surgeon, to Panteg Hospital, Griffithstown, Mon.

Details of the children operated on in 1965 are as follows :

Date.	No. of children operated upon	Type of operation.
21. 1.65	1	Left recession and resection.
29. 7.65	1	Right external rectus recession.
14.10.65	1	Bilateral internal rectus recession.
Total		3

### ORTHOPTIC TREATMENT.

The Orthoptist employed at the Brecon Hospital continues to treat children referred to her by Mr. Hoare from his School Clinics and this work has increased to such an extent that the Orthoptist now attends at the Hospital more often than the one session per week originally allotted for this work when the scheme first commenced in 1960. This arrangement for orthoptic treatment for our children works very satisfactorily.

Orthoptists are also employed at Merthyr General Hospital, Swansea General Hospital and the Royal Gwent Hospital, Newport, and these facilities can also be used by Breconshire children if required.

### ORTHOPÆDIC SCHEME.

A number of children were seen by the Orthopædic Surgeon, Mr. Roy Treasure, F.R.C.S., at the monthly clinics held at Brecon Hospital, when your Orthopædic Nurse attends to assist the Specialist by arrangement with the Regional Hospital Board.

By arrangement with the Regional Hospital Board, Mr. Treasure held Orthopædic Clinics at the Brecon Clinic on 2 occasions during 1965.

The details of school-children seen at these clinics are given below. These figures do not include children of under-school age who were seen.

**Centre—Brecon.**

**Consultant—Mr. R. Treasure, F.R.C.S.**

	16.3.65.	21.12.65
1. No. called up for examination	19	23
2. No. present and examined	14	18
3. No. found not to require treatment	6	—
4. No. found to require domiciliary or clinic treatment	8	18
5. No. found to require hospital treatment	—	1
6. No. for X-rays	2	2
7. No. recommended to see Consultant again	—	—

---

**REPORT ON THE SCHOOL DENTAL SERVICE, 1965  
BY THE PRINCIPAL SCHOOL DENTAL OFFICER,  
MR. J. H. SUTCLIFFE, L.D.S.**

I have the honour to present to you a report on the School Dental Service for the year ending 31st December, 1965.

The staff of two dental officers remains unchanged but one of the two dental surgery assistants, Miss D. Jones, resigned in November and Miss E. Abrahams was appointed on 1st December to fill the vacancy. Although there were three enquiries for details of the vacant post for a third dental officer, no applications were received.

As in previous years, regular fixed clinics have been held at Brecon, Brynmawr, Builth Wells, Cefn Coed, Crickhowell and Ystradgynlais and additional sessions held following routine inspections of adjacent schools. The clinics at Hay and Tirabad have been visited for treatment following routine school inspections and additional sessions held to suit requirements.

The old equipment, which was installed at Brynmawr in 1938 has been replaced by a modern unit, operating light, X-ray, turbine drill, dental cabinet and dental chair with additional seat incorporated for use when treating very small children. Both patient and operator will benefit from these changes in equipment. The old equipment, installed at Ystradgynlais in 1938 has similarly been replaced to bring it up to the standard in Brynmawr mentioned above. In 1966 the same improvement will be carried out at Brecon. It will then be necessary to see what items of old equipment are still serviceable and how they can best be utilised in the minor clinics and certain schools where treatment is given in the medical inspection rooms.

During the year, 5,095 children were inspected and 2,891 or 57% were found to require treatment. This is the lowest percentage since 1953 when the figure was 55%. Another encouraging figure is that for the number of children fitted with dentures which has fallen to 10 compared with 16 in 1964 and 19 in 1963.

Sixteen sessions were devoted to Dental Health Education and these have followed the lines of 1964 — film strips with accompanying recorded commentary, flannel graph, models, and practical demonstrations in the correct use of the tooth brush, supplemented by chairside talks during treatment. The question and answer session following the showing of a film strip met with a surprisingly good response in some schools.

One eleventh of your officers' time was made available for the treatment of expectant and nursing mothers and young children.

I would like to express my appreciation of the co-operation and assistance of Head Teachers and their staffs in all aspects of the School Dental Service and particularly in the field of dental health education.

---

## **POLIOMYELITIS VACCINATION.**

This is a service provided under Section 26 of the National Health Service Act. I would, however, like to express my appreciation to the Head Teachers of schools in the County for their co-operation in allowing pupils to attend at the Clinics for vaccination.

During the year the age range of persons eligible for vaccination remained at 6 months to 40 years, and open sessions were held at the various centres in the County. In addition a certain amount of vaccination was carried out by general practitioners on their own patients.

In April, 1961, the Ministry recommended that a fourth dose should be given to school children between the ages of 4 years and 12 years and this policy was continued in Breconshire during 1965.

I give below the figures of children between 4 years and 15 years of age who had been vaccinated by the end of the year:—

No. of children born between 1950 and 1961 inclusive who had received two injections of Salk Vaccine or 3 doses of Oral Vaccine up to the end of 1965 ... 8,630

Of these children, number who had received three injections by the end of 1965 (or two injections and one oral dose) ... 8,275

Of these children, number (born between 1949 and 1960) who had received four injections by the end of 1965 (or three injections and one oral dose or four oral doses) ... 7,161

In addition, the issue of oral vaccine (Sabin) was commenced by the Ministry in 1962 and this was brought into use in our clinics, where patients now have the option of either Salk vaccine injections or Sabin oral vaccine which is taken with sugar or syrup. The primary course of oral vaccine consists of three doses given at monthly intervals whereas the primary course of Salk vaccine consists of 2 injections at an interval of three weeks; this is followed at an interval of 7 months by a third re-inforcing injection.

### **B.C.G. VACCINATION AND TUBERCULOSIS.**

In 1959 proposals were submitted by the County Council to the Welsh Board of Health for the extension of the Council's original scheme, which was approved in 1954. The extension of the scheme provides for the skin testing or re-skin testing annually of all pupils over the age of 13 years and for vaccination or re-vaccination, if necessary. This extended scheme was carried out by your Medical Officers in 1965, and details of the work are given in Part VIII of this report. Details of the X-ray examinations resulting from these skin tests are shown in Part IX.

### **T.B. SERIAL TESTING IN SCHOOLS.**

In addition to the annual skin testing and B.C.G. vaccination of children over 13 years of age in schools, a scheme was introduced in Breconshire in 1961 whereby school children of all ages are skin tested annually and positive reactors X-rayed.

Annual tuberculin testing of all school children provides accurate and reliable information regarding the number of children infected from natural sources during any period of twelve months.

The annual conversion rate of non-reactor children will serve as a reliable index of the prevailing risk of infection in the community. When the conversion rate is found to be abnormally high in any class, school or district it indicates

that viable tubercle bacilli are being disseminated freely and that intensive case-finding investigations should be applied, including possibly the mass radiography service.

A teacher disseminating viable tubercle bacilli would also be detected early and the spread of infection would be stopped.

Investigations should also be carried out among the home contacts of the convertors in an attempt to discover the source of the infection.

Serial tuberculin testing therefore provides a method of detecting sources of infection which otherwise would not have been discovered until later.

Details of this work carried out in 1965 are shown in Table X and the resulting X-Ray examinations are given in Table XI.

---

## REPORT ON THE SCHOOL PSYCHOLOGIST SERVICE,

By Mr. John N. Davies, B.Sc. (Special), D.E.P.  
(Birmingham).

### Referrals—

Fewer children were referred during this year than the previous year. The total number referred for major psychological examination was 97. They were distributed as follows: Girls, 30; boys, 67. The distribution of intelligence was:

0-45	...	5	2
46-55	...	0	1
56-79	...	5	14
80-89	...	7	16
90 +	...	13	32
Not Tested	...	0	2
Total		30	67

Of these children all but 19 had poor attainments at school. This 19 is distributed as follows: 5 girls and 14 boys. Of the 5 girls, 4 had behaviour difficulties and one had no handicap at all. Of the 14 boys, 5 had behaviour difficulties, 5 had another major handicap, 4 were found to have no particular handicap. These were young children who had previously been thought to be at risk. Nine children were referred for psychiatric investigation. All of these were boys. They were referred to the following: Child Guidance Clinics: Merthyr Tydfil 4, Swansea 3, Monmouthshire 2.

In addition to the assessment of these individual cases the school population has been screened for poor attainments and a large number of children have been provided with materials for remedial work in the basic subjects.

The authority has been considering the establishment of a small diagnostic unit for borderline E.S.N./mentally subnormal children and to this end I have visited similar units in Cardiff and Glamorgan in the company of the Principal School Medical Officer.

The authority has decided that as far as possible the education of educationally subnormal children shall be carried on in the ordinary day schools and to this end the appointment of a number of specialist teachers of the E.S.N. is being considered.

29th April, 1966.

## PART 1.

### MEDICAL INSPECTION OF PUPILS ATTENDING MAINTAINED PRIMARY AND SECONDARY SCHOOLS (Including Nursery and Special Schools)

TABLE A. — PERIODIC MEDICAL INSPECTIONS

Age Groups Inspected (By year of Birth)	No. of Pupils who have received a full medical examination.	Physical condition of Pupils Inspected. ## TREATMENT OF PUPILS ATTENDING MAINTAINED PRIMARY AND SECONDARY SCHOOLS (Including Special Schools).

**Table A — Eye Diseases. Defective Vision and Squint.**

	No. of cases known to have been dealt with
External and other, excluding errors of refraction and squint ...	—
Errors of refraction (including squint) ...	364
Total ...	364
No. of pupils for whom spectacles were prescribed ...	174

**Table B — Diseases and Defects of Ear, Nose and Throat.**

	No. of cases known to have been dealt with
Received operative treatment—	
(a) for diseases of the ear ...	—
(b) for adenoids and chronic tonsilitis ...	18*
(c) for other nose and throat conditions ...	—
Received other forms of treatment ...	12*
Total ...	30*

\* This is the number of children known to have been operated on, but the true figure will be greater than this as hospitals do not generally notify this Office of cases treated.

Total number of pupils in school who are known to have been provided with hearing aids:—

(a) in 1965 ...	—
(b) in previous years ...	7

# PRIMARY, SECONDARY AND COUNTY GRAMMAR SCHOOLS

## PART III (Continued).

**Table C — Orthopaedic and Postural Defects.**

(a) Pupils treated at clinics or out-patient departments	...	994
(b) Pupils treated at school for postural defects	...	—
Total	...	994

**Table D — Diseases of the Skin** (excluding uncleanliness).

No. of cases treated or under treatment during the year by the authority:—

Ringworm—(a) Scalp	...	—
(b) Body	...	—
Scabies	...	3
Impetigo	...	5
Other skin diseases	...	4
Total	...	12

**Table E — Child Guidance Treatment.**

No. of pupils treated at Child Guidance Clinics under arrangements made by the Authority	...	7
--	-----	---

**Table F — Speech Therapy.**

No. of pupils treated by Speech Therapists	104
--	-----

**Table G — Other Treatment Given.**

(a) Pupils with minor ailments	...	8
(b) Pupils who received convalescent treatment under School Health Service arrangements	...	—
(c) Pupils who received B.C.G. Vaccination		651
(d) Other than (a), (b) and (c) above	...	—
Total (a) to (d)	...	<u>659</u>

# PRIMARY, SECONDARY AND COUNTY GRAMMAR SCHOOLS.

## PART IV.

Dental Inspection and Treatment carried out by the Authority during the year ended  
31st December, 1965.

### 1. Attendances and Treatment
